

Certificate of Raw Material

We herewith certify that the raw materials of our products are as follows:

1- Raw material of the Plastic

The main components of the plastic is Polyethylene Terephthalate

2- Raw material of the Cap

The Safety Cap of TUD Blood Collection Tubes is made from polystyrene plastic. The cap covering the stopper prevents blood spilling out when the cap is pulled off.

3- Raw material of the stopper.

The stopper of TUD Blood Collection Tubes is made from butyl rubber. The butyl stopper ensures no air penetrating into the tube even reduplicate puncturing. No crumb and reductive substances appear after puncturing.

4- Material of the GEL

The main component of Gel is olefin oligomer.
